Fire Classification	Crib 5 and Schedule 1, Part 1 of the Furnishings and Furniture (fire)(safety) Regulations 1988 (amended 1989)
Bass Trap Description	Triangle corner mounted bass trap with a egg box profile face

#### Description

The Bass Trap PRO has a egg box convoluted profiled face. If you want Bass Traps in your studio that look a little bit different then these are the ones to go. The egg box profiled face is the same profile as the F.A.T. Acoustic Tiles we produce so if you have installed these tiles in your studio and you want continuity then the Bass Trap PRO's are the Bass Traps for you.

The Bass Trap PRO's offer very good absorption at low frequencies. This is thanks to the triangle wedge design that has been employed in the development of this Bass Trap. These bass traps are available in 2ft and 3ft lengths and can be cut to length if required.

Getting control of your studio should be high on the list of priorities and effective acoustic treatment is the only means of doing that. By installing these Bass Traps PRO's in your studio you will gain control over your low frequency energy which will result in more accurate recordings with tighter more defined bass.

The acoustic foam we use conforms to the more stringent fire tests of Crib 5 and Schedule 1, Part 1 of the Furnishings and Furniture Regulations so you will have peace of mind that the product you are using is safe also. And you also have our guarantee that the foam will stand the test of time. The colour we use has been carefully selected to ensure that it doesn't quickly discolour or fade over time. You won't have the problem of the foam crumbling and turning to dust either. We know that treating your studio is a big investment and we want to make sure that your investment stands the test of time. The only way to ensure that is by sticking with Advanced Acoustics. We have many years of experience in acoustic treatment and soundproofing. Acoustic Treatment and Soundproofing are the only products we deal with. You won't see us selling any other forms of foam or bedding. Acoustic foam is all we do and we are very good at it as our outstanding feedback and

previous customers will testify. Our products have been used by a full host of companies including the BBC, Williams F1 Team, McLaren, Cisco, Cadburys and ITN just to mention a few.

This item is kept permanently in stock. The foam we use is an open cell polyurethane acoustic foam and is available in charcoal only.
