

Advanced Acoustics Speaker Isolation Pads – Sloped Version

Data Sheet

Individual Isolation Pad Size	4 ½" x 14" (115mm x 355mm)
Quantity Of Isolation Pads Per Box	4 (enough for 2 speakers)
Platform Height	Slopes 1" to 1 ¾" (25mm to 45mm)
Acoustic Foam Colour	Black
Acoustic Foam Density	80 kg/m ³
Acoustic Foam Composition	High Load Bearing Open Cell Polyurethane Acoustic Foam
Fire Classification	Crib 5 and Schedule 1, Part 1 of the Furnishings and Furniture (fire)(safety) Regulations 1988 (amended 1989)
Product Description	Speaker Isolation Platform

Description

If your studio monitors are sat directly on the desk your room will suffer from unwanted and harmful vibrations. The vibrations from the speaker resonate on the desk with the desk amplifying the resonances. This vibration then passes through floor and to the rest of the room. These unwanted vibrations can severely affect your recordings. So the best way to avoid this problem is by de-coupling the monitors from the desk. By sitting your studio monitors on a pair of our Speaker Isolation Pads you will cut out that vibration passing through your desk and into the rest of the studio.

By de-coupling your studio monitors with the isolation platforms you will allow your speaker to work much more effectively giving you a tighter low end and reduce any muddy bass you have.

The acoustic foam we use conforms to the more stringent fire tests of Crib 5 and Schedule 1, Part 1 of the Furnishings and Furniture Regulations so you will have peace of mind that the product you are using is safe also. And you also have our guarantee that the foam will stand the test of time. The colour we use has been carefully selected to ensure that it doesn't quickly discolour or fade over time. You won't have the problem of the foam crumbling and turning to dust either. We know that treating your studio is a big investment and we want to make sure that your investment stands the test of time. The only way to ensure that is by sticking with Advanced Acoustics. We have many years of experience in acoustic treatment and soundproofing. Acoustic Treatment and Soundproofing are the only products we deal with. You won't see us selling any other forms of foam or bedding. Acoustic foam is all we do and we are very good at it as our outstanding feedback and previous customers will testify. Our products have been used by a full host of companies including the BBC, Williams F1 Team, McLaren, Cisco, Cadburys and ITN just to mention a few.

This item is kept permanently in stock. The foam we use is an open cell polyurethane acoustic foam and is available in black only.
